

DuoRIP DOUBLE RIPPER FOR ROOT EXTRACTION

Unmatched Root Removal Power: The Double Ripper Attachment. Tackle stubborn root systems with ease for efficient land clearing.

Key Features:

- **Double Shanks for Powerful Root Extraction**
- **Durable Construction** for Long Service Life
- Fits Most Excavator Models
- Available teeth systems: **CAT J series, BYG Super V, ESCO UltraLok**

Equip your excavator for superior performance on any land clearing project with the Double Ripper attachment. This innovative attachment features two robust shanks that penetrate deep and rip through even the most stubborn root systems. The Double Ripper maximizes productivity and minimizes down-time, ensuring efficient land preparation for your projects.

The Double Ripper Attachment is ideal for:

- Land clearing and site preparation with challenging root systems
- Efficient removal of large roots, stumps, and debris
- Streamlining land development projects
- Forestry applications requiring effective root extraction
- Any project demanding powerful and efficient root removal

Upgrade your excavator’s capabilities and conquer demanding land clearing challenges with the Double Ripper. Contact us today to explore the perfect fit for your machine!
